# Sufyan Jami

SOFTWARE DEVELOPER

## Profile

Passionate software developer who has a love for writing clean, concise and efficient code. Technologies I like working with are Svelte, React, C#, Java, JavaScript, Python, etc. My portfolio showcases projects I have worked on and my passion for computer science.

## Employment History

### Full-Stack Software Engineer, Entergrade Solutions, Remote

DECEMBER 2023 — PRESENT

- Designed and developed a back-end API application used by over a million users.
- Tested API endpoints thoroughly, including edge and corner cases.
- Built front-end dashboards with Svelte and TypeScript.
- Created a standardized app shell to speed up front-end development.
- Worked with Microsoft Teams and Microsoft Admin Center as part of the application.

### ASP.NET Core Developer, Canadian Bar Association, Remote

JANUARY 2023 — DECEMBER 2023

- Worked with various teams weekly to understand feature requirements and implemented them using .NET Core, C#, MySQL and Kentico 13.
- Enhanced user-experience when adding features while keeping the integrity of the software.
- Thoroughly tested each feature in various scenarios to ensure the best user experience and accessibility.

### Tier 2 Forms Programmer, PBS Systems Inc, Calgary

APRIL 2019 — JANUARY 2023

- Managed programming for new dealership setups, created tailored solutions.
- Automated important parts of the process to boost team productivity.
- Guided junior programmers through training, code reviews, and provided documentation for learning.
- Created various process documents to help new hires and team members work more efficiently.

### Website Developer, All-In-One Digital, Calgary

DECEMBER 2018 — APRIL 2019

- Designed and Developed 10+ custom websites from start to finish.
- Worked with stakeholders to meet their needs and provide solutions.
- Implemented Search Engine Optimization.
